

This booklet was developed by members of the Westerhope Community Partnership who have lived in the area for most of their lives.

The guide builds on the Westerhope Wheel Project. The colliery wheel forms part of the trail and was installed at the eastern gateway to Westerhope in 2008 to celebrate the area's mining heritage, ensuring that it is not forgotten.

No evidence of the colliery that once dominated the original "garden village" remains, but this local area heritage guide provides an introduction to the interesting history behind "the Hope of the West".
